

## Our very own Gadget Man

Have you met our very own Gadget man  
If you need anything, then sort it, he can  
Basically, I was lagging while telling my tales  
I needed a gadget to help clear the rails  
Something like we have, a caravan rail brush  
Then the cogs starting turning and he had a brain rush  
Each week I would get an update on the progress  
Some, was a bit technical to me, I must confess  
Then on 3<sup>rd</sup> August the unveiling day was here  
Sitting on the track, waiting, and all ready to clear  
The 'Flying Mullet' started off pushing the ballast away  
Clearing leaves, and was even fitted with a weeding spray  
This will certainly make life easier clearing both tracks in one go  
Thanks to our Gadget Man, have you guessed, do you know?
